**University Response to
Virtual World Learning**

Abstract & Bio

Abstract: This presentation provides a first-hand take on academia's response to virtual world learning over the last 15 years. Steve Van Hook brings more than 20 years' experience as an educator, author, innovator, and course designer. He will cover university response to over a decade of Virtual World educational possibilities, citing administrator, instructor and student concerns including:

- Appeals and protests of Virtual World learning
- Cost-effective program development
- Best VW teaching tactics and practices
- Benefits and necessities of immersive experiential learning
- Field-trip invitation to a Virtual World campus

Bio: Dr. Steven R. Van Hook has taught communication and culture classes for universities in the USA and abroad for 25 years, developing one of the first hybrid virtual courses for UCSB in 2000. He has led in academic positions including faculty senator, ombudsman, curriculum development, accreditation review, and instructor mentoring. He is President of Educare Research, a nonprofit program serving international educators and students. He's been a newspaper columnist, radio reporter, TV news anchor, and science podcast host. He was a television producer and bureau chief in Moscow, USSR from 1989-91; and for three years directed public education media programs in Ukraine through the United States Agency for International Development (USAID). He has served as a trainer and officer for organizations including VISTA, Head Start, as a licensed Master Captain by the US Coast Guard, and a private pilot. He has a PhD specializing in transcultural learning, and is published in scholarly journals including UNESCO's *Prospects*, and by SAGE. He has presented on virtual world education to administrators and groups at UCLA, UCSB, VWBPE, VWEC, The Science Circle, and elsewhere. Research website: <http://wwmr.us>

A Tour Of The Virtual World: How To Engage Students & Create A Sense Of Belonging Online

DATE

Wednesday, January 25

TIME

3:00-4:00pm (Eastern)

Overview

Educators can be COVID-challenged to keep students and funds flowing, while promoting healthy and enriching academic options. Virtual World learning may provide immersive hands-on experience for engaging students and offering a sense of place and belonging, so important to student success and retention in online education.

This easy virtual VW visit through Zoom covers: evolution of virtual world learning, academic necessities for learning alternatives, socioeconomic drivers and gains, fulfilling student desires for immersive experience, benefits of experiential learning, providing dimensional sense of space, sample in-world learning centers, forming partnerships between academia and emerging technology, effective gamification of learning, bridging the digital divide, and a self-guided field trip to a Virtual World campus.

Objectives

- Learn about the evolution of Virtual World (VW) learning
- Examine best practices in VW education
- Learn about fulfilling student desires and demands for more immersive online learning experiences
- Discover how to provide a sense of 'place' in virtual world settings
- Critique samples of VW learning centers
- Explore new models of student engagement and interactive learning
- Discover the future trends and the holistic vision of educational possibilities
- Use a free field trip invitation to a virtual world campus

The Metaverse Hype Cycle

[Graph Link](#)

‘The Metaverse Hype Died Down. Where Does That Leave Colleges That Invested In It?’

- Businesses may have backed off the vision of a large, billionaire-controlled metaverse because of its link to Meta (Facebook) ... but there are still lots of little metaverses being built in education.
- Even if it's fairly common for an enthusiast to get some momentum behind building a metaverse, it's less common to have that baked into the infrastructure or the budget of the institution.
- Some of the initial lessons that the university wanted to create, like organic chemistry and anatomy labs, required details that raised the expense and priced the school out.
- “I don't have rose-colored glasses on it; it was not a perfect experience for us. But it was the spark that lit the kindling.” – University Official.

‘Metaversities Face Financial Reality’

- “Faculty and students are taking to learning in the metaverse, but universities wonder how they will pay for it once Meta’s (\$150 million) two-year pilot program ends.”
- “The overall buy-in for the metaverse has cooled with the rising popularity of artificial intelligence.”
- “I think virtual reality and really, augmented reality, will inevitably be central to what a learning experience looks like,” he said. “But that’s probably 20 or 40 years away. We have such a long way to go.”

Morehouse College students use Meta's virtual reality headsets to enhance their learning in a microbiology class.

A "digital twin" of California-based Fullerton College, meaning an exact replica of the college campus in the

Meetings can also be held in the metaverse.

Metaverse Innovators

Students in VXRLabs Biology

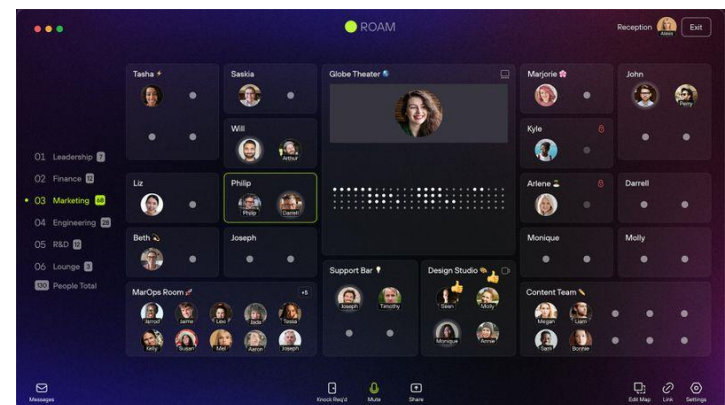

VictoryXR's goal is to bring a more immersive way for students to learn through virtual and augmented reality. Since VictoryXR's founding in 2016, online education has rapidly grown in the United States and across the globe. Unfortunately, the traditional classroom has not adapted to online education. In the current form, online students find learning difficult, passive, and unenjoyable via video conferencing.

That is where VictoryXR comes in. We offer immersive classrooms and campuses through virtual reality. This platform allows for students to interact in a synchronous yet virtual environment. Educators are given training and 3D objects (over 6,000 and growing!) to teach a variety of subjects to their students. The best part? Students' grades go up. Student focus goes up. Student enjoyment goes up.

‘The Power and the Peril of Virtual Reality in HE’

- These tools stand to reshape higher education in some powerful ways. But the immense potential is still only that: potential.
- A future where universities and their learners are divided into virtual haves and have-nots is not difficult to imagine – and it must be prevented.
- After all, an institution may well be on the cutting edge, but for what purpose? Indeed, purpose must be a guiding force for institutions seeking to answer the most pressing questions about immersive learning.
- A well-designed VR curriculum might be entertaining and engaging, but if the strengths of the programme are not tightly aligned with the needs of educators and students, it accomplishes very little.
- Equity, access and inclusion must serve as the driving force behind any conversations related to integration.
- This is not a case of using technology for technology's sake but a purposeful effort to create inclusive healthcare training for a diverse cohort of learners.

Mark Milliron
National University
President / CEO

Cheating

- Educators scramble to catch cheaters
- Some teachers use AI to prepare syllabi, lectures, presentation slides, exams, and grading.
- [Coursera AI for Teachers](#)

Employment

- Preparing students for demand of AI-enhanced workforce
- College 'cheating' with AI may be a careerwise talking-point
- [Article in Inside Higher Education](#)

What Students Want per Survey

- Students expect 'total flexibility' in pandemic-era classroom
- 90% want to submit assignments online
- 68% want recorded asynchronous lectures
- 67% want online exams
- Majority (61%-83%) want some in-person interaction (small lab sections, group work, symposia)

‘Students Want Virtual-Learning Options’

- The share of students enrolled only in online courses nearly doubled since 2019.
- "Having everything transitioned to Zoom was actually the world opening up and not closing down."
- "Remote/hybrid learning plays a vital role in our mission to provide high-quality, accessible education that is affordable and tailored to the needs of our diverse student population."
- "Remote classes offer an affordable and time-saving way to continue learning."
- "Virtual learning makes taking a meaningful stand more difficult, because we're not breathing the same air and we can't see the nuances of one another's expressions and reactions as we can when we're present, live, together."
- "College leaders, she said, need to answer to "how they are supporting their faculty not only in developing their online pedagogy, but also in these questions of burnout, trauma, and stress."

Article

THE CHRONICLE OF HIGHER EDUCATION

Students Demand Virtual Learning So Colleges Adjust

- 40% of college administrators prioritizing demand for online learning; 35% reexamining strategies considering student demands
- Older students are also demanding flexibility in learning, expanding across student population
- This growing demand for online and hybrid education has likely not yet reached its peak
- Most administrators looking for balance by 2025 for a more-balanced in-person, hybrid, online courses

[Article](#)

THE CHRONICLE OF HIGHER EDUCATION

What Must VW & Ed Tech Do?

- **Prepare for show-time**
Online is here to stay: Some students will demand it. Administrators are looking for options and have a budget.
- **Understand demands of academia**
Costs, student overhead, Title IX, privacy, harassment, performance standards, etc.
- **Ease of access**
Instant teleport for nonmembers, limited function, prebuilt facilities
- **Rich functionality**
Just as Zoom, Skype, TikTok

"The affordances and resilience of online delivery in this pandemic have permanently embedded online distance education as the advancing partner in the mode of delivery of learning."

**The Speedy Future of Delivering
Online Learning**
Inside Higher Ed

Academia Realities

- Lower state funding
- Demographic dip
- Lower enrollments
- Stressed administration
- Limited budgets
- Adjunctification of faculty
- Demand for course conversions
- Costs of new tech
- Cuts into dining and campus revenue

Walk in Another's Skin

Stroking a black rubber hand reduced a participant's implicit racism score

Participants develop increased empathy for differences and suffering by VR immersion and experience

- *Gender Switch*
- *Race Switch*
- *War Zone Experience*
- *Wheelchair Accessibility*
- *Etc.*

He refers to virtual reality as an "empathy generating machine" to give people experiences they can't have in any other way.

Cosplay

Superhero cosplay makes you a better person for one science-backed reason:

- Heroic stories and experiences can create a unique emotional response: [elevation](#)
- Ninety-one percent of participants who saw a superhero poster stayed afterward to help, whereas only 75 percent of people who saw the neutral poster did.
- In a [virtual reality study](#), half of the participants were given the power of flight, like Superman. The second half got to fly, too — but as passengers in a helicopter. Flying participants generally helped more quickly than helicopter participants

Visualizing ‘Doing’ Helps Us Learn

SCIENTIFIC AMERICAN®

- ‘Visualization and action are intimately connected, involving the motor cortex. Thinking about our body doing something—raising an arm or walking forward—activates the motor cortex directly.’
- ‘This ability to trigger the motor cortex by imagining an action offers great promise in therapies for patients recovering from stroke and for athletes or dancers working to develop expertise in their craft.’
- ‘As we get older, the motor cortex has to work harder to imagine actions, so exercising our visualization skills remains important throughout our lives.’
